

LED Lampione 1 - 2 - 3 - 4 - 5

Gamma di apparecchi a LED per illuminazione di aree urbane. Ideale per l'illuminazione di percorsi pedonali, parchi, aree residenziali. I prodotti sono stati costruiti conformemente alle normative vigenti, anche facendo riferimento alle leggi contro l'inquinamento luminoso. La struttura del corpo lampada è stata ingegnerizzata e costruita per garantire la totale dissipazione del calore dei LED in tutte le variabili di installazione, comprese quelle atmosferiche.

Installazione: su palo con codolo Ø 60mm.

Corpo e telaio: in alluminio pressofuso UNI 5076 verniciato con polvere termoindurente poliestere.

Verniciatura: di tipo poliestere eseguita a polvere, resistente agli agenti atmosferici, alla corrosione e garantita per 1.000 ore in nebbia salina. Colore Grigio RAL 9007 (LED Lampione 1 LED Lampione 3), nero RAL 9005 (LED Lampione 2, LED Lampione 4 e LED Lampione 5).

Ottica LED Lampione 3: diffondente.

Schermo LED Lampione 1: policarbonato rigato resistente agli shock termici e agli urti.

Schermo LED Lampione 2: vetro temperato di spessore 4mm resistente agli shock termici e agli urti.

Schermo LED Lampione 3: policarbonato rigato resistente agli shock termici e agli urti.

Sorgente: LED **SAMSUNG LUMILEDS**

Mantenimento del flusso luminoso minimo al 70% - 80.000h (L70B20) per l'80% dei LED.

Temperatura di colore: 4000K; altre temperature di colore a richiesta.

A richiesta protezione alle sovratensioni:

modo differenziale 6kV (L-N)

modo comune 8kV (L-GND, N-GND, L&N-GND)

Norme di riferimento: IEC 61000-4-5; EN60598-1;

EN60598-2-1; EN62471; EN62031; EN60598-2-5

EN61547

Range of LED luminaires to light up urban areas.

Suitable for pedestrian paths, parks and residential areas lighting. The products are developed in compliance with norms currently in force, also referring to legislation regarding light pollution. The structure has been designed and built to allow total LED heat dissipation considering all installation variables, including different atmospheric conditions.

Installation: on pole with Ø60mm spigot.

Housing and frame: made by UNI 5076 die-cast aluminum, coated with polyester thermoset powder.

Coating: coated with powdered polyester, resistant to atmospheric agents, corrosion and guaranteed for 1.000 hours in saline mist. RAL 9007 Grey color (LED Lampione 1 and LED Lampione 3), RAL 9005 black color (LED Lampione 2, LED Lampione 4 and LED Lampione 5).

LED Lampione 3 optic: diffused.

LED Lampione 1 shield: striped polycarbonate resistant to thermal shocks and collisions.

LED Lampione 2 shield: tempered glass with 4mm thickness resistant to thermal shocks and collisions.

LED Lampione 3 shield: striped polycarbonate resistant to thermal shocks and collisions.

Source: LED **SAMSUNG LUMILEDS** Maintenance of minimum luminous flux to 70% - 80.000h (L70B20) for 80% of LED.

Color temperature: 4000K; other color temperatures available on demand

On demand surge protection:

differential mode 6kV (L-N)

standard mode 8kV (L-GND, N-GND, L&N-GND)

Standard reference: IEC 61000-4-5; EN60598-1;

EN60598-2-1; EN62471; EN62031; EN60598-2-5;

DYNA control - Mezzanotte virtuale - Virtual midnight

DYNA CONTROL è un sistema automatico di controllo del flusso luminoso delle lampade. Il sistema entra in funzione alla prima accensione calcolando per 3 giorni i tempi di accensione, il quarto giorno il sistema in modo autonomo, calcola la mezzanotte virtuale eseguendo una regolazione del flusso regolando la lampada come indicato sullo schema di Fig. 1; per i primi tre giorni, quindi, il sistema manterrà le lampade accese al 100%, nel tempo di accensione dell'impianto, il quarto giorno entrerà in funzione il sistema DYNA CONTROL gestendo in modo autonomo il flusso luminoso garantendo così un notevole risparmio energetico.

Accensioni inferiori ad 1 ora (es. manutenzione) verranno ignorate ed il sistema non entra in funzione, per accensioni da 1 a 4 ore (es. anomalia impianto) o superiori alle 23 ore (es. impianto sempre acceso), il sistema resetta il timer quindi ricomincerà a contare per i primi 3 giorni e successivamente riprenderà il funzionamento automatico.

DYNA CONTROL ist ein automatisches Steuersystem für den Lichtstrom der Lampen. Das System wird bei der ersten Zündung in Betrieb genommen, indem die Zündzeiten für 3 Tage berechnet werden. Am vierten Tag berechnet das System autonom die virtuelle Mitternacht, indem der Durchfluss durch Einstellen der Lampe wie in der Abbildung in Abb. 1 dargestellt eingestellt wird. Während der ersten drei Tage hält das System die Lampen während des Einschaltens des Systems zu 100% eingeschaltet. Am vierten Tag wird das DYNA CONTROL-System in Betrieb genommen und verwaltet den Lichtstrom unabhängig, wodurch erhebliche Energieeinsparungen erzielt werden.

Einschalten von weniger als 1 Stunde (z. B. Wartung) werden ignoriert und das System startet nicht. Bei Einschalten von 1 bis 4 Stunden (z. B. Systemanomalie) oder länger als 23 Stunden (z. B. System immer eingeschaltet) setzt das System das zurück Der Timer beginnt dann in den ersten 3 Tagen erneut zu zählen und nimmt dann den automatischen Betrieb wieder auf.

Fig. 1

Esempio applicativo 2 steps - Application example 2 steps

T1 = 100% Flusso luminoso - Luminous flux

T2 = 70% Flusso luminoso - Luminous flux

Minimo tempo di accensione per funzionamento automatico 4 ore (3 giorni).
Accensioni di 1 ora ignorate.

Accensioni da 1 a 4 ore oppure superiori alle 23 ore resettano il sistema.

The minimum ignition time for automatic operation is 4 hours (three days).

Ignitions 1 hour ignored.

Switching from 1 to 4 hours or higher with 23 hours reset the system.
